EDUCATION

University of Notre Dame

Notre Dame, IN

Bachelor of Science in Computer Engineering | Minor: Engineering Corporate Practice | GPA: 3.7

May 2028

Activities: Irish Sat GOAT Lab, Robotics Football Club Electrical Team, Incoming Career Assistant (Fall 2025)

Engineering Study Abroad: London, England

May. 2025 – Jun. 2025

Notre Dame Aerospace Career Trek: Northrop Gruman, JPL, SpaceX

July 2025

WORK EXPERIENCE

University of Notre Dame

Notre Dame, IN

Student Researcher

Aug. 2024 – Present

- Researched under Prof. Chaoli Wang by data labeling image data and downloading GSV data of households, surveying heat dissipation in household.

ENGINEERING PROJECTS

Sensor Graphic User Interface Arduino

Long Beach, CA

Developer

- Developed a real-time data visualization interface in Python (Tkinter/Matplotlib) for serially streamed MPU9250 accelerometer data from an Arduino microcontroller.
- Engineered a modular project structure including serial communication controllers, GUI logic, and sensor data parsing to enable future reuse across embedded systems projects.
- Validated end-to-end system by integrating sensor readings, asynchronous serial data handling, and python threading for smooth user interaction.

IrishSat's Pi Hat PCB

Notre Dame, IN

Designer

- Designed a custom Arduino R3 hat PCB using KiCad to integrate and optimize Arduino and H-bridge circuits, improving system efficiency and reducing assembly complexity.
- Created and corrected the generated Bill of Materials and Component Placement List files from KiCad to export to JLCPCB for manufacturing.

Air Quality Sensor Housing | Engineering Design

Notre Dame, IN

Developer

- Collaborated with a team of four engineering students to develop and iterate on sensor housing with a rack-and-pinion opening mechanism actuated by a servo motor and ESP32-based microcontroller.
- Designed and prototyped with SolidWorks in two design phases, optimizing for form, fit, function, and durability through iterative testing and feedback

Portfolio Website | andres-perez0.github.io

Long Beach, CA

Developer

- Developed a portfolio website with Astro and Tailwind CSS frameworks as the front end

LEADERSHIP AND ACTIVITIES

IrishSat's Gravitational Orbital Attitude Thermal Lab

Notre Dame, IN

Electronics Lead

Aug. 2024 – Present

- Appointed as incoming Electronics Lead to oversee embedded systems development and PCB design initiatives for the Helmholtz cage project, coordinating hardware-software integration efforts across the cubesat projects.
- Engineered a Python-based data acquisition pipeline for magnetometer readings from Arduino, converting raw serial outputs into MATLAB-compatible formats for post-processing and modeling.
- Collaborated under expert mentorship to refine IrishSat's Helmholtz Cage design, integrating PCB design (KiCad), control algorithms (MATLAB), and embedded Linux systems (Raspberry Pi) into a unified testing platform.

TECHNICAL AND LANGUAGE SKILLS

Programming: C, C++, Python, Git, MATLAB

Tools: Microsoft Office Suite, KiCad, Vim, SolidWorks, Fusion 360

Skills: Technical Writing, Electronics Soldering

Language: English (Native), Spanish (Bilingual)

Hobbies: Japanese(N4-N5), Chess (1000+ Rapid), Calisthenics, Amateur Radio
