EDUCATION

University of Notre Dame

Bachelor of Science in Computer Engineering | Minor: Engineering Corporate Practice

Graduation Date: May 2028

GPA: 3.7/4.0

Engineering Study Abroad: London, England

May 2025 – Jun. 2025

Notre Dame Aerospace Career Trek: Northrop Gruman, JPL, SpaceX

Jul. 2025

Enrolled Courses: Data Structures, Discrete Math, Intro. to ECE, Engineering Physics II, Linear Algebra & Differential Equations

RESEARCH & WORK EXPERIENCE

Department of Electrical Engineering

Aug. 2025 – Present

- Developing a real-time Python software interface for tracking and visualizing GPS-enabled test resources, for drones and software-defined radios, that parses NMEA strings to extract GPS data and displays it on a live map using the folium library, supporting various research experiments.
- Creating weekly PowerPoints to summarize project progress and update next goals.

Department of Computer Science and Engineering

Aug. 2024 – Present

- Researched under Professor Chaoli Wang by data labeling image data, downloading GSV data of households, and surveying heat dissipation in household.

Engineering Career Assistant | Meruelo Family Center for Career Development

Sep. 2025 – Present

- Coauthoring a bi-weekly newsletter for sophomores, juniors, and seniors, highlighting career opportunities and alumni spotlights from various majors and post-graduate experiences.

ENGINEERING PROJECTS & LEADERSHIP

IrishSat's Gravitational Orbital Attitude Thermal Lab | CubeSat Team

Notre Dame, IN

Electronics Lead

Aug. 2024 – Present

- Appointed as incoming Electronics Lead to oversee embedded systems development and PCB design initiatives for testing equipment, particularly a Helmholtz cage project, coordinating hardware-software integration efforts across the cubesat projects.
- Collaborated under expert mentorship to refine IrishSat's Helmholtz Cage design, integrating PCB design (KiCad), control algorithms (MATLAB), and embedded Linux systems (Raspberry Pi) into a unified testing platform.
- Assembled a custom 2S2P battery pack using 18650 lithium-ion cells to make a 7.2V 7000 mAh battery pack. The completed pack was then integrated with a Battery Management System (BMS) to validate its nominal values.
- Used multimeters, LCR meters, power supplies, soldering equipment, and spot welders to complete assembling tasks.

Hardware-Accelerated Human Activity Classifier | Independent Project

Long Beach, CA

- Built a wireless data acquisition system using two Arduino Uno R3s, an MPU-9250 IMU sensor, and nRF24L01 RF transceivers.
- Developed a C++ sketch to sample raw accelerometer and gyroscope data, format it, and transmit it wirelessly to a receiving station. Along with a Python script to receive, parse, and log the real-time sensor data, generating a custom labeled dataset for walking and sitting.
- Trained a 1D Convolutional Neural Network in PyTorch to classify human activities (walking, sitting) with 96.7% accuracy, documenting model stability and performance by visualizing accuracy against hyperparameters (learning rate, window size, and optimizer).

Helmholtz Cage Driver PCB

Notre Dame, IN

- Designed a custom Arduino R3 hat PCB using KiCad to integrate and optimize Arduino, magnetometers, and H-bridge circuits, reducing assembly complexity.
- Amended the generated Bill of Materials and Component Placement List files export to JLCPCB for manufacturing.

Air Quality Sensor Housing | Engineering Design

Notre Dame, IN

- Collaborated with a team of four engineering students to develop and iterate on sensor housing with a rack-and-pinion opening mechanism actuated by a servo motor and ESP32-based microcontroller.
- Designed and prototyped with SolidWorks in two design phases, optimizing for form, fit, function, and durability through iterative testing and feedback.

Portfolio Website | andres-perez.github.io

Long Beach, CA

- Developed a student and engineering project portfolio website with Astro and Tailwind CSS frameworks as the front end.

TECHNICAL AND LANGUAGE SKILLS

Tools: Microsoft Office Suite, KiCad, Vim, SolidWorks, Fusion 360

Skills: Technical Writing, Electronics Soldering

Programming: C, C++, Python, Git, MATLAB, Astro

Language: English (Native), Spanish (Bilingual)

Hobbies: Japanese(N4-N5), Chess (1000+ Rapid)
